

The background of the slide is a vibrant purple with a wavy, liquid-like texture that flows across the entire frame. Two dark purple rectangular boxes are overlaid on this background, one at the top and one in the lower-middle section.

## Title: *BigBasket Sales Dashboard Project*

### **Problem Statement**

BigBasket manages a catalog of 28K+ products across 2,313 brands and 90 subcategories.  
With such scale, it becomes challenging to:

- Monitor pricing vs discounts
- Identify dominant categories & brands
  - Track customer ratings at scale
- Derive actionable insights for business growth

## Objective

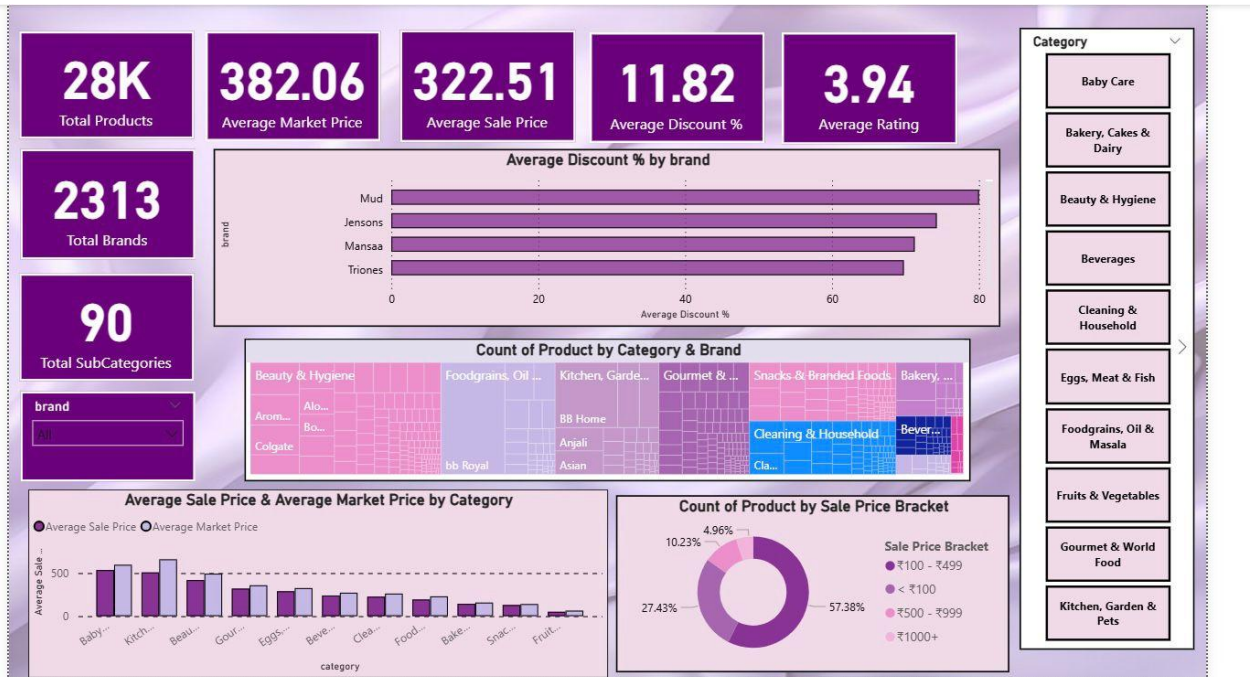

To design an interactive Power BI dashboard that translates large-scale FMCG e-commerce data into clear, data-driven insights for decision-making.

## Dashboard Features

- KPI Cards → Snapshot of overall business health
  - Slicers → Drill-down by brand and category
- Treemap & Donut Charts → Category and brand distribution
  - Bar Charts → Market vs Sale price analysis
- Rating Insights → Understanding customer perception

## Key Findings

- Average Market Price: ₹382.06 vs Sale Price: ₹322.51 → Avg. 11.82% discount
  - Mud brand leads in discounts (~80%)
- Beauty & Hygiene 🧴 and Foodgrains 🌾 dominate category variety
  - 57.38% of products fall in the ₹100–₹499 price range
- Average Rating: 3.94/5 → stable but with improvement potential

Category

Baby Care

Bakery, Cakes & Dairy

Beauty & Hygiene

Beverages

Cleaning & Household

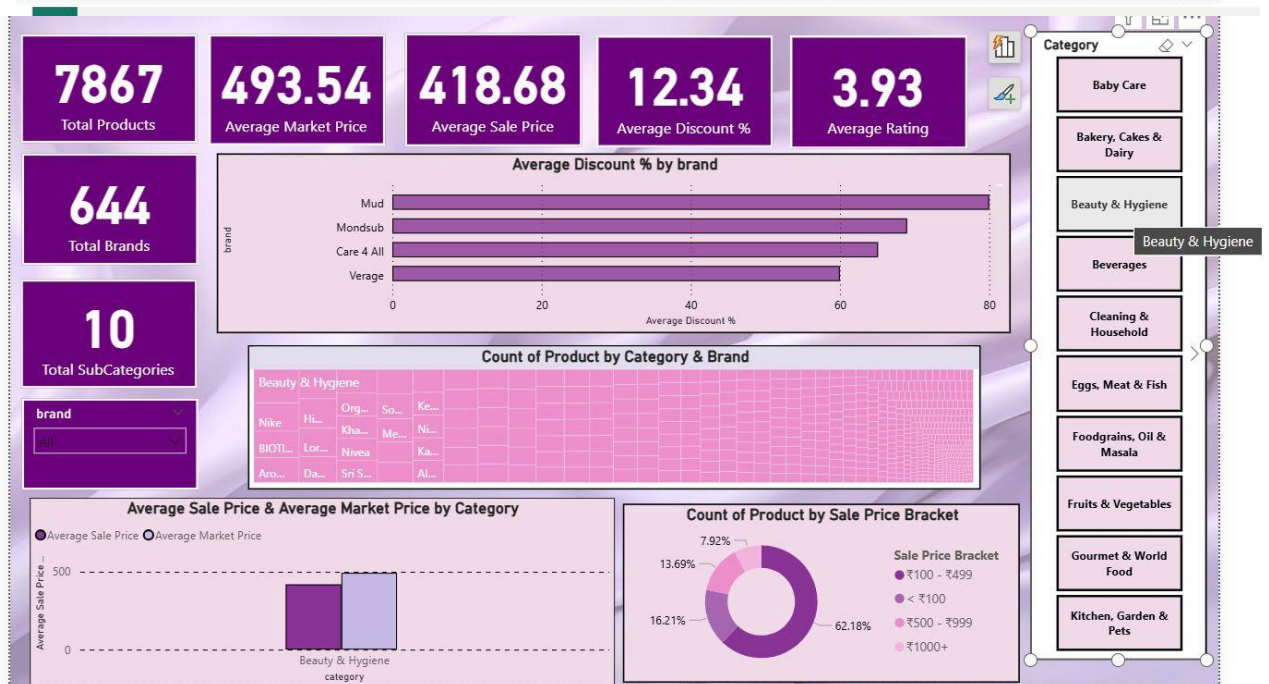

Eggs, Meat & Fish

Foodgrains, Oil & Masala

Fruits & Vegetables

Gourmet & World Food

Kitchen, Garden & Pets

## Conclusion

This project demonstrates how Power BI can convert raw SKU-level data into actionable insights, enabling:

- Smarter discount strategies
  - Optimized product mix
- Improved customer satisfaction tracking
- Data-backed business decisions
